

# University Admissions Service

*Gain your admissions to a top tier North American university. From enrolling in your English course to choosing your future university, we will advise and support you every step of the way, ensuring that your application stands out. Standard service is free for students taking Academic Semester/Year.*

## WHAT CAN YOU EXPECT ON THIS COURSE?

### Experience and Outstanding Partnerships

Since 1992, we have been helping students to apply for Masters, Bachelors and Associate degrees through successful partnerships with leading institutions. Every year, we help hundreds of students reach their goal of attending higher education in the US or Canada.

We provide you with the opportunity to attend prestigious universities through a strong network of selected partners. These partnerships have been built by proving to universities that EC students are exceptionally well prepared for the challenges of life and study in university.

### Placement Service

Our admissions advisors will help you at each step of the process of your university application. They will assist you with preparing every document you need to submit, making sure you put forward the strongest application possible.

You may apply to one of our partners, or any institution in the US or Canada. We will advise you of your options, and help you choose the best university or college for your academic goals. We will also give you counselling regarding courses and majors, recommendations concerning housing applications, and even help you identify potential financial aid possibilities.

### Conditional Admission

You can gain conditional admission to our partner universities and colleges, for both undergraduate and graduate degree programmes, before you even start your English course. We will facilitate your application completely and send you your university admission letter along with your EC acceptance.

### TOEFL/IELTS Waivers

We have developed TOEFL and IELTS waiver agreements with the vast majority of our partner universities, allowing you to enter without a TOEFL or IELTS score. Students who successfully complete their Intensive programme, do not have to worry about taking an official exam to prove their English language proficiency.

### Whats included:

- Comprehensive university and college advisory service
